

ABOUT US

We are a couple of open source aficionados who have a specific interest in China related Open Source Intelligence (OSINT). We aim to provide inspiration and resources to those looking to deepen their understanding about some of the key themes related to China by the use of OSINT techniques. If you want to get in touch please contact us on our X profile @allsourcechina.

NEWSLETTER

This newsletter has been designed to showcase the top China related content, we have found the most useful. We will mostly be focusing on Open Source aspects but will include article for context on current events in China . It will include news articles X (Twitter) profiles, podcasts and anything else we think more people should know about. We hope to be able to produce a newsletter once a month.

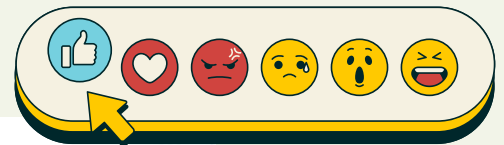

欲穷千里目，更上一层楼。

IF YOU WANT TO SEE A THOUSAND LI, THEN CLIMB UP ANOTHER FLOOR.

FERGUS RYAN (X -@FRYAN)

[HTTPS://TWITTER.COM/FRYAN/STATUS/1728887913096909140](https://twitter.com/fryan/status/1728887913096909140)

Fergus has written an amazing thread on foreign vloggers in China making pro CCP content. He includes many examples of influencers who are known for creating this type of content. It is an interesting insight into what the CCP see as worth while content to promote on Chinese social media. The influencers depicted are mostly western individuals, with the majority coming from the US. In the videos they are outwardly praising the CCP and criticizing anything western.

 **Fergus Ryan** @fryan · Nov 26
China's influencer market is booming & foreigners are getting in on the action.

While many avoid politics, a growing cadre, tempted by traffic, profits & plaudits are aligning their content to CCP-approved narratives.

A  on the foreign vlogger to CCP propagandist pipeline.

CHINA MEDIA PROJECT

[HTTPS://CHINAMEDIAPROJECT.ORG/2023/11/17/A-SINGLE-PAGER-ON-THE-BIDEN-XI-SUMMIT/](https://chinamediaproject.org/2023/11/17/a-single-pager-on-the-biden-xi-summit/)

CHINA NEWSPEAK A Single Pager on the Biden- Xi Summit

With so much reporting and analysis to consume in the wake of the meeting between Xi Jinping and Joe Biden, we break down China's response by focusing on the country's most important front page.

NOV 17, 2023

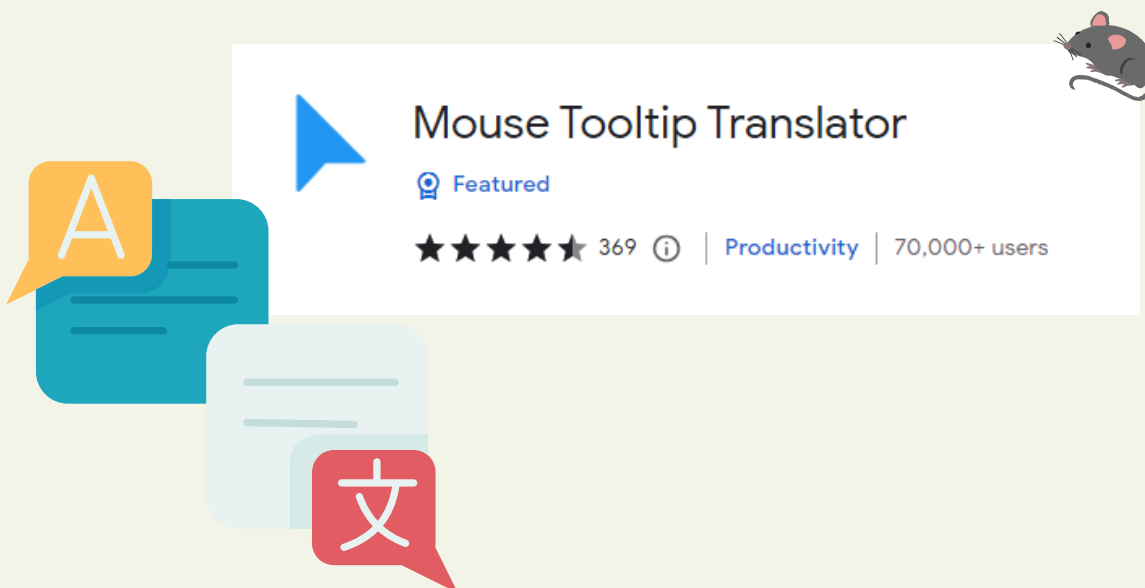

The China Media Project have done a brilliant job at summarizing the Xi-Biden summit. There was an influx of media reporting about the whole event and we found this article the best at giving us the most relevant information. It highlights key points around leaders' discussions on regional security, economic issues, and human rights concerns. The analysis suggests that while the summit may not have yielded major breakthroughs, it played a crucial role in setting the tone for future interactions between the two nations. Well worth a read.

MOUSE TOOLTIP TRANSLATOR

[HTTPS://CHROMEWEBSTORE.GOOGLE.COM/DETAIL/MOUSE-TOOLTIP-TRANSLATOR/HMIGINKGIBHDCKIAPHHMBGGGHUCHDJC?HL=EN](https://chromewebstore.google.com/detail/mouse-tooltip-translator/hmiginkgibhdckiaphhmbggghochdj?hl=en)

When looking at China OSINT it is inevitable that we come across Chinese language. It can be difficult to get translate on some web-pages. We have found that Mouse Tooltip Translator helps with big pages of text. It is a Chrome extension designed to provide simplified translation by allowing users to translate text instantly by hovering the mouse over a word or letter. The extension utilizes Google Translate and Google Text-to-Speech services for its functionality but also has options for other translation tools. As it is a Chrome extension, it can only be used on a Google Chrome browser. The Chinese translation is accurate enough to get a sense of what a character or sentence means. It would be wise to pair this tool with other translation tools for a better understanding. It's a free tool so it's worth trying out.

AIDA KOKANOVIC'S BLOG

GPT BOT FOR OSINT INVESTIGATIONS

This blog post discusses the utilization of a GPT (Generative Pre-trained Transformer) bot for Open Source Intelligence (OSINT) investigations. Kokanovic explains how OSINT specialists can leverage AI, particularly ChatGPT, to streamline their investigative processes. ChatGPT assists in identifying anomalies or discrepancies during OSINT efforts. The blog emphasizes the role of ChatGPT in saving time and expanding the scope of investigations by quickly identifying login pages, sensitive information, and files. The article provides insights into the practical applications of ChatGPT for OSINT and its potential in automating the analysis and extraction of information from extensive text data. We think this would be interesting to see how well this would work on China specific OSINT investigations.
